Election/Restrictions

This restriction is in response to applicant amendment filed 2/4/03.

Pursuant to 35 U.S.C. 121 and 37 C.F.R. 1.141, the antisense compounds in claim 1 are subject to restriction. The Commissioner has partially waived the requirements of 37 C.F.R. 1.141 and will permit a reasonable number of nucleotide sequences to be claimed in a single application. Under this policy, up to 10 of independent and distinct nucleotide sequences will be examined in a single application. (see MPEP 803.04 and 2434)

Claim 1 claims antisense compounds which are targeted to and modulate the expression of a nucleic acid encoding CD81 where the compounds are targeted to specific target regions of SEQ ID NO: 3, SEQ ID NO: 11 and SEQ ID NO: 10. Although the antisense compounds claimed each target and modulate the expression of the same gene, the compounds targeting the recited target region sequences are considered to be unrelated, since each antisense compound claimed is structurally and functionally independent and distinct for the following reasons: each antisense compound has a unique sequence (nucleotide, for example) corresponding to the recited target region, each antisense compound targets a different and specific region of a nucleic acid encoding CD81, and each antisense compound, upon binding to a nucleic acid encoding CD81, functionally modulates (increases or decreases) the expression of the gene and to varying degree (per applicants' Table in the

specification). Furthermore, a search of more than one (1) of the antisense target region sequences recited in claim 1 presents an undue burden on the Patent and Trademark Office due to the complex nature of the search and corresponding examination of more than one (1) of the claimed antisense sequences. In view of the foregoing, one (1) antisense sequence is considered to be a reasonable number of sequences for examination.

Claim 3 recites specific antisense sequences and applicant is also required to elect one sequence for examination. The elected sequence must correspond to the region elected from claim 1. The antisense oligonucleotides recited in Claim 3 are restrictable for those reasons set forth above.

Further, MPEP 808.02 states in part:

Where the related inventions as claimed are shown to be distinct under the criteria of MPEP 806.05(c) - 806.05(i), the examiner, in order to establish reasons for insisting upon restriction, must be shown by appropriate explanation of one of the following:

(c) A different field of search: Where it is necessary to search for one of the distinct subjects in places where no pertinent art to the other subject exists, a different field of search is shown, even though the two are classified together.

It is noted that a search of the available sequence databases produces a listing of references disclosing the sequence most similar to the query sequence (target region). This is the "place" where the examiner searches for prior art. The prior art relating to another query sequence (a different target region) will not be

found in this "place"- a different listing of references must be generated and searched by the examiner. Thus a different search is shown, and restriction is proper.

Accordingly, applicants are required to elect an antisense compound targeted to one (1) target region from claim 1 and an antisense oligonucleotide sequence from claim 3 that corresponds to the elected region of claim 1.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
